

# Contact Time Zone and Language

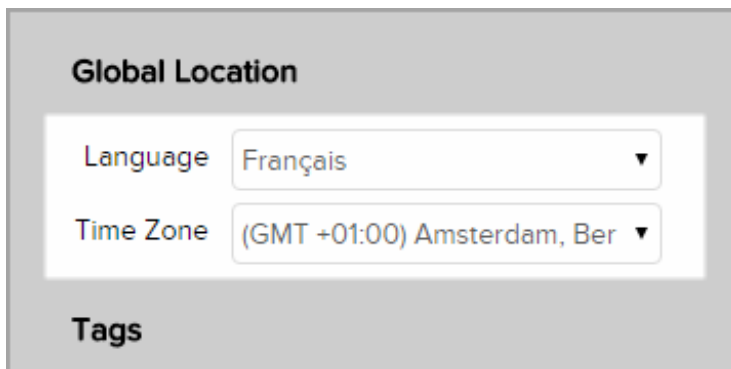

Connect with context!

See your customers' local time, language, and weather so that you can make a personal connection from the start.

- When contacts fill out a web form, order form, shopping cart, pay a quote, or pay an invoice, Infusionsoft captures the timezone in the contact record.
- When contacts submit a web form, Infusionsoft captures the language.

You can manually change a contact's language and time zone:

1. Find Global Location in the general tab of the contact record above the tags section.
2. Select from the Language and Time Zone drop-down options.
3. Save the contact record.
