Automate Follow Up on Failed and Error Purchases

"Purchase Actions" are completely optional. A purchase action that runs when a specific item has been purchased is now incorporated directly in the campaign builder. So "Successful Purchase Action", "Contact Creation Action" or "Product-Specific Purchase Actions" may not be very useful to you.

| Configure Purchase | × |

| Any Purchase Specific Product Purchase Product in Specific Catego Calcium Hardness Kit Cance | |

However, the ability to run an action on a "Failed" or "Error" Purchase is still very useful. This will allow you to send an email after a purchase has failed or errored. The email you send can be an apology and your contact information so they can reach you. You may also include an action that sends you a task or email notification so you can follow up with the customer.

By default, purchase actions trigger when someone purchases through the shopping cart and order forms. Purchase actions will also trigger for legacy order form purchases and manual orders if you have a product specific action set up and you have this option enabled under **E-Commerce > Settings > Products** section.

| Contact Creation Action | Actions |
| Successful Purchase Action | Actions |
| Failed Purchase Action | Actions |
| Error Purchase Action | Actions |

- **On Login (Multi-Step Cart)**: These actions are triggered when someone enters their username and password to log into a multi-step shopping cart.
- Contact Creation Action: These actions are triggered when someone purchases who was not already in your Infusionsoft database. The system checks based on first name, last name, and email address. It will create a new contact record if no match exists.
- Successful Purchase Action: These actions are triggered each time an order is placed and the credit card charge processes successfully. It can be used to trigger a new customer welcome and transition a contact from prospect to customer by updating tag(s) and contact type.
- Failed Purchase Action: These actions are triggered when an order is placed, but the credit card charge fails. You can send a notification email to an internal team member and / or send the customer a message prompting them to contact you to resolve the problem.

- Error Purchase Action: These actions are triggered when there is an error (other than credit card failure) that prevents the order from processing successfully. You can send a notification to an internal team member to investigate the error and work to resolve it.
- 3. To create product specific actions for individual products, click inside the text box and start typing the name of a product, Once you find the product you are looking for, click on it.
