

Add Contacts To A Sequence In Infusionsoft Sync For Gmail

Gmail Sync is no longer available. Please use the [Email Sync tool](#) that automatically syncs Gmail and Microsoft accounts to your Infusionsoft app.

Legacy Warning: Follow-up Sequences have been replaced with the automation available in the Campaign Builder. However, for those that are more familiar with follow-up sequences, you can still use them here.

1. Click the **Add a sequence** link under the **Follow-up Sequences** header
 2. Select the **Follow-up Sequence** and click the **Start Sequence** button.
