

October Update 2018 | Classic Infusionsoft

Contact, Tags and Campaign Improvements

It's now easier to perform search and add functionality with campaigns, contacts and tags in Classic Infusionsoft. A number of enhancements have been made to make it easy to search contacts with a given tag, view tags associated with an opportunity, set an app to preserve search results, make bulk category changes on tags, and more.

To learn more about each enhancement, click below:

- [Make bulk category changes on tags](#)
- [Deleting within Campaign Canvas](#)
- [The option to preserve search results](#)
- [From the tag list, quickly view contacts with a given tag](#)
